

1. Skidanje python-a

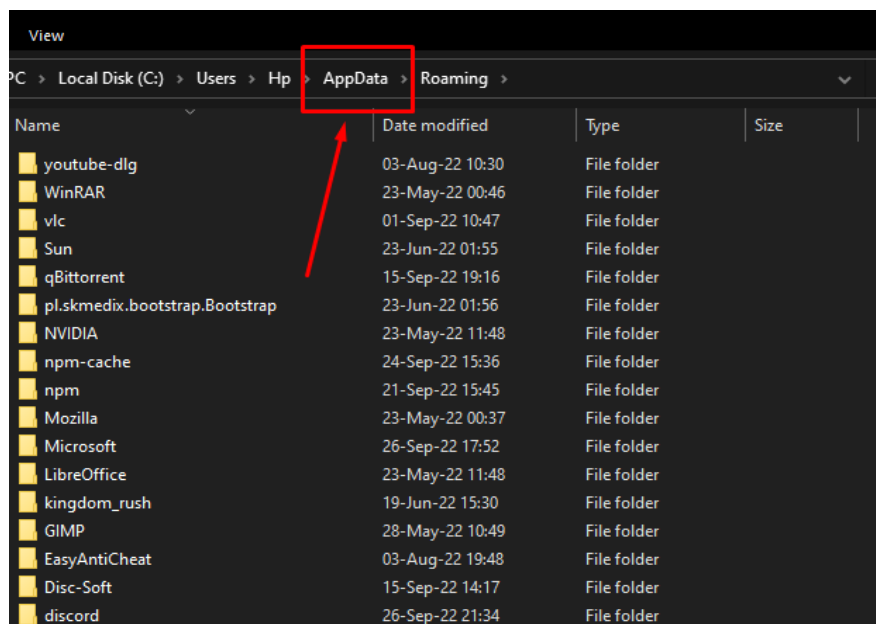

<https://www.python.org/downloads/>

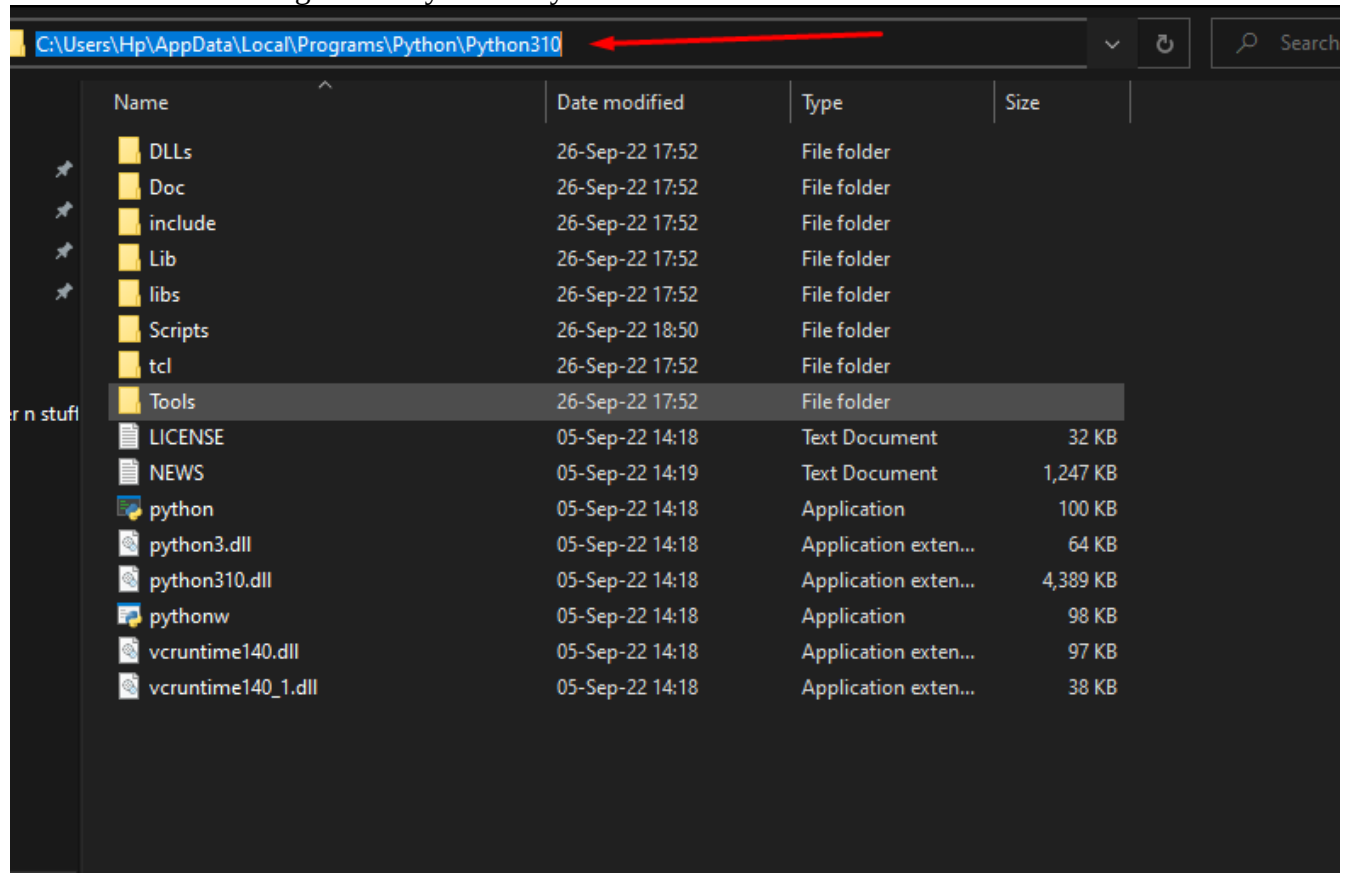

2. %appdata% (i enter) u search-u

3. Vraćanje unazad

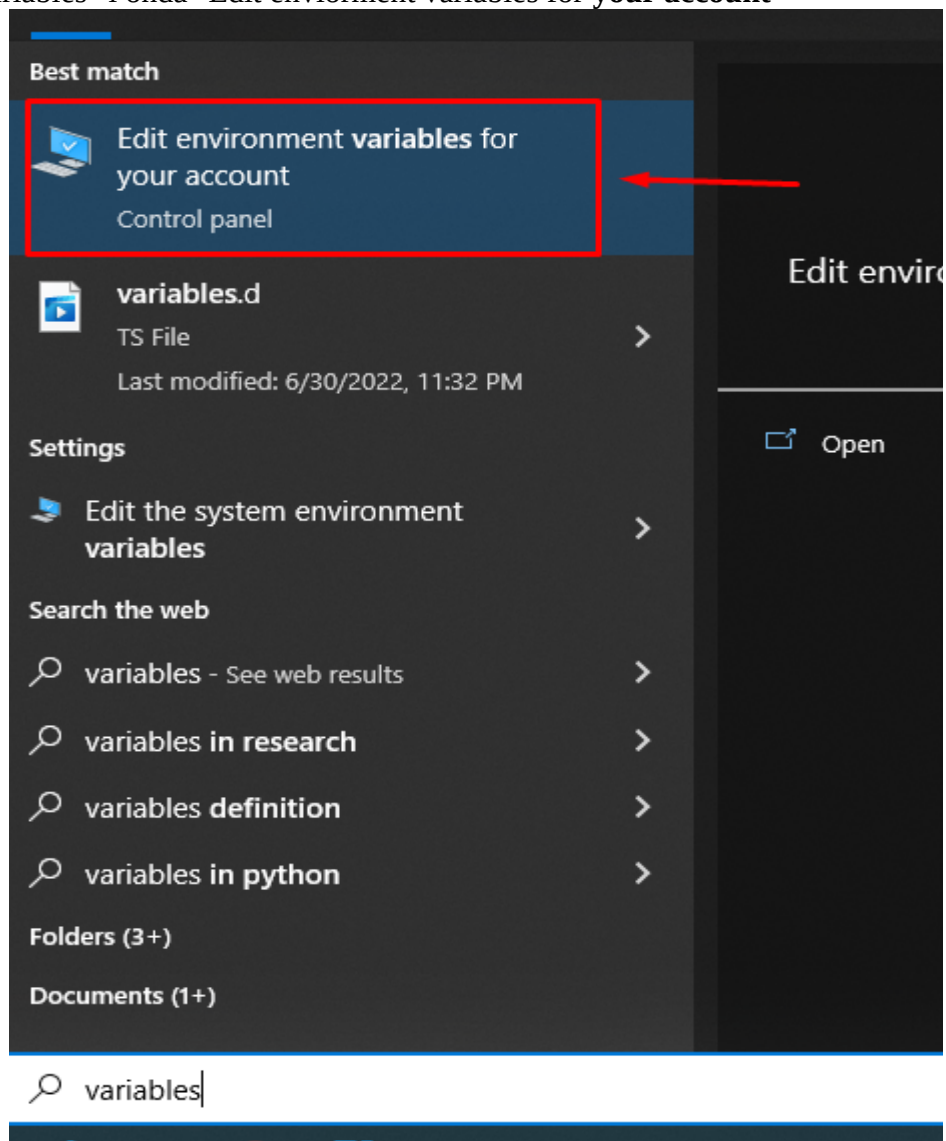

4. Odatle Local > Programs > Python > Python310

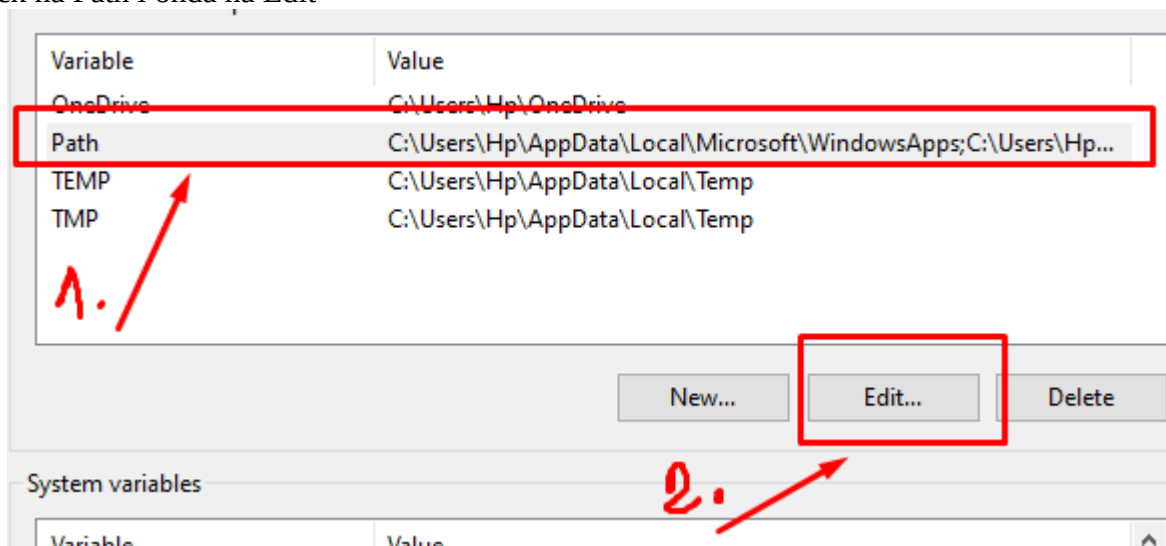

5. Kopiranje tog direktorijuma C:\Users\{USERNAME}\AppData\Local\Programs\Python\Python310

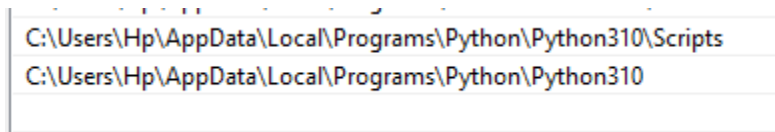

6. U Startu "variables" i onda "Edit enviornment variables for **your account**"

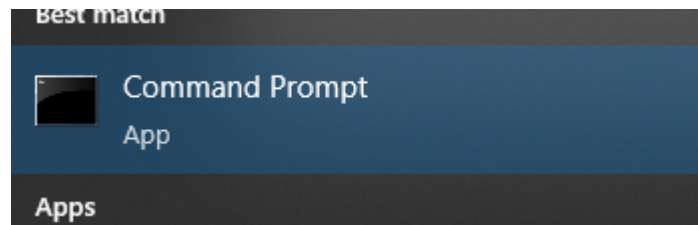

7. Click na Path i onda na Edit

8. Klik na "New" i tu se pasteuje onaj direktorijum iz 5. koraka, zatim opet na New i samo se doda na kraju istog direktorijuma *\Scripts*

9. U startu "cmd" i otvaranje cmd-a

10. Unosjenje `pip install PythonTurtle` (mozda ces ovo morati da uradis u visual studio code terminalu nakon sto otvoris ceo folder u njemu [za otvaranje terminala Terminal > New Terminal])

11. Da se pokrene samo otvoris `main.py` fajl
